| 累计检测面积<br>The cumulative detection area | 整个车轮踏面<br>The whole wheel tread                  |                            |  | 累计返修长度 mm<br>The cumulative length of repair | /                                      |                                     |                  |

结论: 经磁粉检验, 所检 4 件车轮踏面符合 JB/T5000.14-2007 2 级标准规定, 评为合格。

Conclusion: the magnetic particle inspection, the inspection 4 pieces of wheel tread conforms to the standard JB/T5000.14-2007 grade 2, rated as qualified
